Clinical indications and treatment protocols with Platelet-rich plasma in Dermatology

Editors: Rubina Alves, Ramon Grimalt
Contributing authors: Isabel Andia, Lola Bou, Elena Conde, Juan Ferrando, Leonor Girão and Jeremy Magalon.

The interest and use of platelet-rich plasma in Dermatology as a new treatment option has surely increased over the past few years. Leading experts have contributed to this book, offering a theoretical and practical approach to the use of platelet-rich plasma. This is a concise and easy-to-read guide, oriented towards the application of PRP in Cosmetic Dermatology, hair loss, chronic wounds and other clinical challenges such as burn scars. At the end of the book, the reader can find suggested protocols for such uses.

The book is therefore aimed at those who are willing to take first steps in using PRP, while it is also for those who are already familiarized with it and would like to read about further expertise and practical information. We hope the present volume will facilitate and stimulate the clinical use of PRP.

Chapters include:

- Platelet-Rich Plasma Biology
- Medical devices for the production of PRP
- PRP in Alopecia
- PRP in Cosmetic Dermatology
- PRP in Wound Healing
- PRP and other applications in Dermatology
- Controversies in PRP
- Protocols
